### **REASONS FOR ALLOWANCE**

1. Claims 1-15 are allowed.

Claim 1 is allowed because applicant's argument is found persuasive. In particular, the prior art of record fails to disclose or suggest a voltage generator including, in combination with other elements, a second reference voltage generator generating third and fourth reference voltages, and a drive circuit having a first node and a second node connected to the third and fourth reference voltage, respectively.

Claims 2-8 and 15 are allowed because they depend on claim 1.

Claim 9 is allowed because the prior art of record fails to disclose or suggest a voltage generator including, in combination with other elements, second to fourth nMOS transistors, and second to fourth pMOS transistors with the recited connections and operations set forth therein.

Claim 10 is allowed because applicant's argument is found persuasive. In particular, the prior art fails to disclose or suggest a voltage generator including, in combination with other elements, the second input of the first and second differential amplifier is directly connected to the output terminal, and fourth and fifth resistance elements as recited in the claim.

Claim 11 is allowed because the prior art of record fails to disclose or suggest a voltage generator including, in combination with other elements, first and second N-type MOS diodes with the recited connections set forth therein.

Claim 12 is allowed because the prior art of record fails to disclose or suggest a voltage generator including, in combination with other elements, first and second P-type MOS diodes with the recited connections set forth therein.

Claims 13 and 14 are allowed because they depend on claim 10.
